

## Endorsement of Services...

"(We) partnered with the team from Career Momentum on several occasions to provide outplacement services to individuals who were impacted by a reduction in force. In addition to Outplacement services, they also provided on-site assistance to our internal HR team on the day individuals were notified.

Everyone I interacted with at Career Momentum was professional, personable and responsive. What I was most impressed by was how they customized their services to the needs of the individual. They did not just meet with the person once, give them a binder of information and send them on their way. They served as a Career Coach who really took the time to get to know the individuals and their career interests. They also took the initiative to follow-up with individuals to make sure they were engaged in the process.

All individuals were provided with Career Coaches who were well versed in the latest job searching techniques. In addition, I found the staff at Career Momentum to be very well networked in the community, which helped impacted employees find a new position in a timely manner."
